I find it amazing that the Federal Govt would go through such extrodianry lengths to prosecute Bill GAtes and Microsoft. I cant speak on the legal technacalities of the lawsuit but the Microsoft s impact on the United States is clear. Over the past 10 years computers the internet and technology have been made more available to households and schools across the country. I find it odd that this can be considered some sort of monoply that is harming our nation. Microsoft has done wonders for our scociety making computers cheaper easier to use and more avialable. Thank You for your time. Marc T Povondra
